

Powell

Turn Microsoft 365 chaos into clarity. Intranets employees love.

Powell is the digital workplace that makes work effortless - no compromises, no clunky tools. Built on Microsoft 365 and SharePoint, Powell turns corporate chaos into clarity.

We help complex global organizations **connect people**, simplify governance, and create intranets employees actually want to open.

With teams in France, Germany, Australia, and the U.S., we support over:

550 Clients **2M** Users every day

Because “good enough” isn’t good enough.

Transform your existing tools into a single, beautifully designed intranet.

-  Unified platform: One space for IT, HR, and Communications.
-  Human-centric: Effortless to manage, delightful to use.
-  Native security: Built on Microsoft 365 for maximum compliance.
-  Regulated focus: Designed for high-trust, high-stakes environments.

Microsoft 365 can **feel like a maze**. Too many tools, too little alignment, and an intranet that no one visits. Powell changes that - turning a fragmented environment into a secure, engaging digital workplace where alignment, engagement, and efficiency finally happen.

We end the false choice between IT control and employee experience. Powell makes governance easy for IT, communication simple for HR and Comms, and **collaboration enjoyable for everyone** - all within your existing Microsoft 365 environment.
